**Project #7** : Security Dashboard  
**Website** : <https://fnf.ondefendapp.com/>  
**Duration** : 2 Months  
**Team Size** : 2 Members

### **Description:**

Most security test results are provided in generic reporting files making their clients manually enter the remediation tasks into their ticketing systems. We take this to the next level. First, we provide all of our test results in an easy-to-import format based on our client's specific requirements. Additionally, all On Defend clients receive **OnDefendManage**, which is our complimentary and ground-breaking cloud-based **Vulnerability Management System** allowing them to efficiently and effectively manage remediation

### **Environnement :**

Codeigniter, Mysql
